Annotation. Article farm host in subjects main activity benefit account to the subject dedicated. In it household host of subjects financial stability and in development main activity benefit account importance is emphasized. In the article main activity benefit account structural parts and him of calculation importance statement will be done. Also in the article household host in subjects main activity benefit account to improve directed important issues, including automation, standardization, analysis make, expenses manage and development discussion will be done. Article, economy host from subjects own activities more efficient organize to reach and financial stability to provide demand doer main activity benefit account about current data present is enough.

Keywords: costs, profit, CVP analysis, activity efficiency, optimization.

Introduction. Household host of the subject main purpose is this financial stability provide and benefit is to get the benefit is that of the subject activity efficiency reflection bringer important indicator is the future development determines. Main activity benefit account household host of the subject main from the activity received income and expenses reflection makes and of the subject real financial situation to determine enable gives.

However, today in the day economic of circumstances fast change, competition increase and technology development household host from subjects own activities more efficient organize to achieve, that's it including the main one activity benefit account improvement demand is doing.

Main activity benefit account:

Main activity benefit account household host of the subject main from the activity received income and expenses reflection makes. This is the report the following elements own into take can:

- Revenues: Product from selling received income, services from showing received income, property from rent received revenues and another revenues.
- Costs: Raw material and materials cost, work right cost, depreciation cost, marketing and advertising cost, energy and communal expenses, taxes and another expenses [1].

Main activity benefit account household host to the subject the following data

present to do help gives:

- Subject's main from the activity received income and expenses to determine
- Basic of activity profitability evaluation.
- Financial the situation analysis to do and future planning for basis create

Main activity benefit account improvement issues:

Current in the day household host in subjects main activity benefit account improvement for the following issues solution to do required:

- Automation: Financial accounts automation household host to the subject data faster and more precisely to get , errors to reduce and work the time to save help gives
- Standardization: Calculation methods standardization household host of the subject different departments between data exchange relieves and of the report correctness provides.
- Analysis: Basic activity benefit account analysis to do household host to the subject activities more efficient organize to do and necessary measures to see possibility gives
- Costs Management: Expenses manage system improvement household host to the subject efficiency increase and benefit level to raise help gives.
- Development: Technology and economic of conditions fast change because of household host from subjects own activities constant respectively improvement and new technologies current reach demand is done [2].

Economy host of subjects main in the activity profit increase and new product work release, perform being increased expenses optimization and product sell volume with dependent calculations based on done is increased. In this analytical calculations past period data and to the experience is based on In enterprises held main analysis clearly data place press if not, it is different management decisions and they are brings consequences about to questions answer in finding very useful. Enterprises operational activity of analysis this aspects light up giver the model is called "Cost - Volume - Profit" (CVP analysis). CVP analysis, first next, operational of activity of the enterprise financial to the results effect to evaluate directed. Work issued product and product sales to the size main attention of our giving reason is the product work while being released expendable resources and work expenses usually known level clearly if so, the product price and to the product has been demand while, is variable will be [3].

CVP- analysis main duties being the following is:

- enterprise by done increased expenses covering product work release size - harmless the point to determine;
- production issued product and him the minimum (breakeven) volume of sales size to determine;
- in the future intended benefit to the amount have to be on the surface work release and him the optimal size of realization set;

- marked this to volumes according to done to be increased expenses the norm set;
- planned expenses norm according to real expenses over control done increase;
- cost-volume-profit according to excess done increased expenses, excess work issued product the size is enough amount not sold product volume compatibility learning and assessment;
- defined shortcomings eliminate reach according to analytical things done increase

Operational in activity CVP of analysis main purpose expenses to the specified optimum size according to done increase reach is considered In general cost, volume, profit (revenue) indicators in growth compatibility study CVP- analysis main direction is our purpose.

Conclusion

Main activity benefit account household host of the subject financial situation to determine and future development designation for important Activity improvement for automation, standardization, analysis, costs manage and to development attention towards the main activity benefit account improvement necessary. This is a farm host from subjects own activities more efficient organize to reach and financial stability to provide demand does Costs, product from selling income and main activity benefit indicators between dependence studied , this of indicators different growth level have when condition is evaluated. This is it from the situation come out operational activity analysis organize reach directions designation possible showing given Summary by doing in other words, work release enterprises main activity efficiency evaluation and analysis right organize to be made, operational activity efficiency determiner indicators right. Systematize them to determine and analysis to do according to work developed invite to practice application, product work optimal output volume mark, current and future enterprise potential to determine according to done increased studies the results to practice current reach in enterprises positive financial to the results reach opportunity creates.
