Introduction

The process of learning the alphabet is important in a child's early educational journey. Learning and memorizing letter names, shapes, and sounds assists and builds the stage for reading, writing, and comprehension skills. Teachers are supposed to make sure that teaching children alphabet should be fun and easier. Actually, the first teachers of children are their moms. Anyways, teachers fulfil both mother's role and teacher's role. Here are different types of techniques of teaching the alphabet:

1. Multi-Sensory Techniques

Multi-sensory learning uses more than one sense, helping children remember information better. When teaching the alphabet, teachers ought to use techniques that include seeing, hearing, and movement. Here is an example for the multi-sensory technique:

Demonstrating colorful, large letters in different colorful papers would assist children recognize and recall the shapes of the letters. To make it clear, flashcards, posters including with alphabet charts are mostly utilized tools in this technique.

2. Storytelling and Alphabet Books In this technique it is suggested to create a story with each letter of the alphabet. To make this engaging and memorable, teachers

may use a character-based story, such as “The was an A-aunt, who saw the B-bee.”

Conclusion

Teaching the alphabet for kids is a difficult but rewarding process. Because teachers are being the part of this life-long foundation of children’s literacy development. This article has provided and explained some useful strategies for teachers to make the teaching process of alphabet easier.
