**Schlüsselwörter:** wichtig, Methoden, Unterrichten, effektiv, Schüler, effektiv, lernen, Unterricht, Englisch.

**Izoh.** Taqdimot shuni ko'rsatadiki, ingliz tilini boshlang'ich sinfgacha o'qitishning turli usullariga ega bo'lish juda muhim. Talabalar har qanday fan bo'yicha turli xil usullarni o'rganish va o'rganishni o'rganishi muhimdir. Shuningdek, talablarga javob beradigan samarali va samarali o'qitish usullarini ishlab chiqish va talabalarga yordam berish va ularga darsni oson etkazish uchun moslashish muhimdir. Maqolada biz boshlang'ich sinflarda ingliz tilini o'rgatish usullari va o'quvchilarni qanday qiziqtirishni ko'rib chiqamiz. Bundan tashqari, ushbu maqola ta'lim usullarining samaradorligini baholash va jarayonni takomillashtirish uchun asos bo'lib xizmat qiladi. o'quvchilarni o'rgatish. U o'qituvchilarga turli usullardan foydalanishga yo'l ko'rsatadi va o'quvchilarning ehtiyojlarini hisobga olishga yordam beradi.

**Kalit so'zlar:** Muhim, usullar, o'qitish, samarali, talabalar, samarali, o'rganimany dars, ingliz.

Nowadays, many teachers are using different teaching methods, these different methods play a very important role for elementary grades, including students should remember them. Students should be taught the tendency to remember words and increase their interest. First of all, it should attract children and keep them focused. Nowadays, such methods are very advanced and can be used with pictures and various toys. such methods help to increase the effectiveness and interest of children in learning English and keep them focused. Information about this is given in some books. For example, memorizing school supplies to first-graders, showing them and repeating them, and telling them visual objects with home furnishings and their colors, helps children to increase their brain activity and their effectiveness in striving goes. They are all designed to help the learner create meaning and retain new information in memory, which facilitates integration with related knowledge and increases the likelihood of later recall and use, especially in the context of transfer. However, we need to apply different methods to the 4th grade, for instance, we need to have a friendly conversation with them, we need to increase their grammar and speaking integration. Future teachers will benefit from this information.

Teaching and learning strategies in primary grades can be used in a variety of ways to increase learning outcomes and the need and effectiveness of English. Also, teaching what you learn has several features. Firstly, it is necessary to increase their interest and use different strategies. In the second learning process, we should use different games and good words to influence their minds. I think that these methods are more effective than other methods. These strategies provide information about new methods.[80,82]. Thus, there are many teaching methods in education, and the demands of students to use many methods for fluency are increasing. The methodology includes various strategies, it will not be easy to apply to primary classes, but it is mentioned in various books and articles. Another large book provide information.[40,45] At present have teaching methods more end more Method of explanation.

The explanation method is based on the teacher explaining a new topic or concept in a lesson to students in a clear and simple language. this method mainly plays an important role in learning new knowledge. At the beginning of the lesson, the teacher briefly explains the topic and explains important concepts. this method is very effective for elementary school students, because they often need the teacher's help in learning new knowledge.

Practical method is a method that help student to apply knowelage in practice the teacher offers students to perform various tasks, exercises and projects. This method increases students' activity in the learning process, teaches them to solve problems and develops creativity. for example, practical activities in subjects such as mathematics, science or technology help students to strengthen theoretical knowledge. [30,38]

In the experimental-methodical method, the teacher offers students to conduct various experiments, observations and practical experiments. This method helps students develop scientific thinking and arouses interest in the studied material. this method is effectively used in natural sciences, especially chemistry, physics, and biology. For example, students can observe the growth process of plants in biology class or perform simple reaction experiments in chemistry class.

Group work method is a method that allows students to work together and communicate. Pupils are divided into small groups and perform a task. the main purpose of this method is to develop the skills of teamwork, exchange of ideas and joint problem solving. This method helps to develop social skills of students in elementary grades and teaches them to work .

The game method is the organization of games and competitions to increase students' interest in the learning process. Using the game method allows students to learn knowledge by playing. this method increases students' activity, attention and memory, and also makes the learning process more interesting and effective for them.

Through games, students learn math calculations, grammar rules, historical events, and more.

The question-and-answer method is based on encouraging students to think about the studied topic and testing their knowledge. During the lesson, the teacher asks students questions and develops their thoughts. this method improves students' memorization, logical thinking, and problem-solving skills. The question-and-answer method also helps students to concentrate and makes it possible for them to master the subject well.

In slides, images and videos, to explain the topic. This method helps students develop their imaginations and better understand the studied material. For 3. Different elementary school students, the visual method is especially useful, because they learn more by seeing and expand their imagination. [28,30]

### **CONCLUSION**

The methods of teaching primary classes show that the use of the above methods will have a good effect on them for the future and will serve to increase the effectiveness of the English language. At the same time, I think that these methods will help young people to choose their profession develops children's minds and brains. In conclusion, elementary grades should be taught using good strategies.
